

Subject: Counterfeit Parts Prevention Clause (QA9)

Dear FIS Supplier,

The following Counterfeit Parts Prevention Clause is applicable to your PO,

The supplier shall certify that no counterfeit materials, parts or components make up any portion or content of the shipment to FIS and the certification shall accompany the shipment along with our Quality Assurance Requirements noted on your Purchase Order.

The certification shall attest to the validity of sub-tier components as being traceable to OEM/OCM sources, including authorized franchised dealers that, in no way, are associated with Counterfeit Work.

Counterfeit Work means work that is or contains items misrepresented by means of deception to make the buyer think the items were designed and produced under an approved system. The term Counterfeit Work includes work that has reached a design life limit or has been damaged beyond the point of rework and /or repair, but is altered and misrepresented as if to be acceptable.

If in supplier format, the text of the Counterfeit Work certification shall be stated as a separate line item or sentence distinguishable from standard Certification of Conformance language.

Please sign and return this certification with shipment certifying product is compliant with the above clause, or include a separate statement certifying such on your COC.

Thank you,
Quality Management
